

PARTH VAREKAR

AI DEVELOPER | BACKEND ENGINEER

parthvarekar27@gmail.com | +91 7400082627 | Mumbai, India | <https://github.com/ParthVarekar> | <https://www.linkedin.com/in/parth-varekar-601432344>

PROFESSIONAL SUMMARY

AI Developer and Backend Engineer specializing in resilient ETL pipelines, multi-agent architectures, and Large Language Model orchestration. Skilled in accelerating rapid prototyping, optimizing RESTful APIs, and translating complex datasets into high-performance machine learning solutions.

SKILLS & COMPETENCIES

AI & Machine Learning: Retrieval-Augmented Generation (RAG), LLM Fine-Tuning, Natural Language Processing (NLP), Multi-Agent Platforms, Prompt Engineering, PyTorch, TensorFlow

Backend & Data Systems: Python, C++, Java, SQL, PostgreSQL, FastAPI, RESTful APIs, ETL Architectures, Microservices Deployment

Frontend & Tools: React.js, JavaScript, Docker, Kubernetes, CI/CD Automation, Git Version Control, GitHub Actions, Linux/CLI

Soft Skills: Cross-Functional Leadership, Technical Communication, Public Speaking, Complex Problem Solving, Agile Adaptability

Interests & Activities: Competitive Hackathons, Orchard Farming, Badminton, Football

PROJECTS

Autonomous AI IDE

[Execution-Aware LLM Architecture](#)

- **Architected an autonomous coding environment** by using multi-agent LLM logic to orchestrate iterative generation, testing, and validation cycles.
- **Engineered automated self-repair workflows**, improving overall software reliability by ensuring the system continuously evaluates and refines algorithmic outputs without human intervention.

Socio Influence | Backend Authenticity Evaluator

[Data Pipeline & API Engineering](#)

- **Created a robust backend framework** implementing scalable data pipelines to process and evaluate influencer authenticity indicators.
- **Structured 900 real-world comment logs**, deploying custom ranking algorithms to convert raw engagement metrics into interpretable, high-value business insights.

Spendly | Personal Finance Intelligence

[spendlypay.tech](#) ↗

- **Launched a secure financial application** that transforms raw transaction data into visualized, categorized spending trends for end-users.
- **Optimized backend state management** and RESTful API integrations to ensure consistent execution and seamless usability under heavy traffic conditions.

Trippy & Gym Tracker | Intelligent Web Platforms

[gym-tracker-chi-six.vercel.app](#) ↗

- **Programmed an AI-driven travel planning platform (Trippy)** that features modular itinerary generation, adaptive budgeting logic, and cross-platform scalability.
- **Constructed a persistent time-series monitoring application (Gym Tracker)** focusing on long-term athletic progress tracking and user-centric statistics.

WORK EXPERIENCE

Rapid Prototyping & Hackathon Execution

[Smart India Hackathon](#), [CodeByte 2.0](#), [Build With AI](#)

- **Secured first place** in the Design Thinking Innovation Competition by translating abstract concepts into functional, high-impact software prototypes.
- **Ranked third in CodeByte 2.0** out of a highly competitive field, demonstrating high-efficiency algorithmic problem-solving under extreme time constraints.
- **Guided cross-functional teams** to design, debug, and deploy full-stack applications, emphasizing agile software development and robust execution.

Data Analytics Intern

[Imarticus Learning](#)

- **Formulated complex SQL queries** to extract and transform over **50,000 data entries**.
- **Visualized analytical datasets** using Power BI, delivering **five interactive dashboards** that reduced weekly reporting time by **15%**.

EDUCATION

Bachelor of Engineering in Computer Engineering

[Expected 2028](#)

Excelsior KC College of Engineering, Thane

CGPA: 8.31/10 | MHT CET: 82 Percentile
